

Passive DMX512 Wall Plates

model: WP-I (Input), WP-O (Output)
technical data sheet

The DMX512 Wall Plates, from Doug Fleenor Design, are an attractive solution for DMX512 inputs and outputs, and are suitable for use in audience spaces. Manufactured from solid aluminum, the plates are black anodized over a grained finish with machined nomenclature. Custom colors and nomenclature are available on request.

The plates fit standard North American single gang electrical boxes and require 1 3/8 inches of depth inside the box.

If you would like assistance in your application, please give us a call. We like to talk with our customers.
